Claims 19, 28 are cancelled.

Claim 30 is amended as the following:

30. A mobile station configured to operate in a wireless telecommunication network, the mobile station comprising:

means for receiving from a network node an encoded point-to-multipoint transmission of same data carried on a common downlink channel;

means for monitoring link quality of the point-to-multipoint transmission; and

means for causing provision of feedback regarding the link quality of the point-to-multipoint transmission on a common uplink channel to the network node.
